Professional Summary

Computer Science and Engineering undergraduate with internship experience in Python Django development, REST API development, and exposure to Agentic AI and Multi-Agent Systems. Experienced in developing a clinical management system and AI-powered applications. Skilled in Python, SQL, Django, MySQL, Git, and API testing using Postman. Interested in software engineering, backend development, and building reliable, maintainable software applications.

Education

Bachelor of Technology in Computer Science and Engineering — Expected 2027
SRM Institute of Science and Technology, Ramapuram — CGPA: 8.71/10

Class XII – Arya Central School (CBSE) — 2023 | 75%

Class X – Christ Nagar Higher Secondary School (CISCE) — 2021 | 89%

Technical Skills

Programming Languages: Python, C, C++, SQL
Backend Development: Python Django, REST APIs
Web Technologies: HTML5, CSS3
Databases: MySQL
Development Tools: Git, GitHub, Postman
AI and Machine Learning: Machine Learning, Natural Language Processing (NLP), Generative AI, LLM Applications, Agentic AI, Multi-Agent Systems, Prompt Engineering
Additional Skills: API Testing, Technical Documentation, AI Workflow Automation, Data Analytics

Work Experience

AI Intern — Jul 2025 – Aug 2025
IBM Technology — Remote

- Explored Agentic AI and Multi-Agent Systems through practical projects and technical learning.
- Worked with IBM Cloud technologies and studied AI deployment concepts.
- Studied autonomous AI agents, orchestration frameworks, and intelligent decision-making systems.

Full Stack Web Development Intern — Jun 2025
Faith InfoTech, Technopark Phase I, Trivandrum

- Developed a Clinical Management System using Python Django and MySQL.
- Built REST APIs to support backend communication and application integration.
- Used Postman to test and validate API endpoints.
- Applied HTML5, CSS3, Django, and MySQL in full-stack application development.

Projects

Stock Market Prediction Using CNN-LSTM Architecture
Technologies: Python, CNN-LSTM, Machine Learning, YFinance API

- Developed a stock market prediction system using a hybrid CNN-LSTM architecture to model patterns in historical stock price data.
- Integrated the Yahoo Finance API through YFinance to retrieve stock market data for analysis and prediction.
- Applied convolutional and recurrent neural network techniques to learn patterns and sequential dependencies in stock price data.
- Incorporated stop-loss calculation functionality to support risk-aware analysis of predicted price movements.

Hybrid AI Framework for Health Risk Assessment and Severity-Triggered Emergency Response *(In Progress)*
Technologies: Machine Learning, Multi-Agent Systems, Healthcare AI

- Designing a multi-agent healthcare framework for health risk assessment, medical report analysis, and severity-based response workflows.
- Developing the project concept around the analysis of patient symptoms, medical reports, prescriptions, and health vitals to support risk assessment.
- Defining a 1–10 severity scale with response workflows for different risk levels.
- Proposing smart ring and smartwatch integration for continuous health monitoring and automated emergency escalation.

Medical AI Bot
Technologies: Python, Machine Learning, NLP

- Developed an AI-powered healthcare chatbot to predict diseases from user-provided symptoms.
- Implemented disease severity classification to support preliminary health risk assessment.

- Built a conversational interface for symptom analysis and healthcare guidance.

CodeVIBE-AI

Technologies: Python, Gemini 2.5 API, Generative AI

- Developed an AI-powered tool to generate human-readable documentation from source code.
- Automated code explanation and documentation generation for multiple programming languages.
- Applied generative AI to streamline developer documentation workflows.

Certifications

- Become an OCI Agentic AI, Enterprise AI, Generative AI Professional – Oracle *(In Progress)*
- AWS Certified Cloud Practitioner – Amazon Web Services (AWS) *(In Progress)*
- From Learner to Builder: Become an AI Agent Architect – IBM SkillsBuild
- C Programming: Increase Career Options and Become a Better Developer – Tim Buchalka, Udemy
- Machine Learning A-Z [2026]: ML, DL, AI with AWS, Python & R – Udemy
- Database and Management System – NPTEL
